

PROPOSED COMMUNITY RISK BASED POLICY FRAMEWORK:

- 1. Prevent any further expansion of the scheme (fixed and mobile).**
- 2. Withdraw the use of mobile devices at locations where no road collisions have been recorded.**
- 3. Contingent to (1) above, to only deploy fixed and mobile devices at locations where the number of road collisions exceeds an agreed threshold over a given period of time; and conversely to withdraw such devices where the number of road collisions falls below an agreed threshold over a given period of time.**
- 4. Phase out the use of fixed and mobile devices at established locations that have a Rated Performance of either weak or poor in favour of other road safety initiatives such as improved road signage, road layout and locally based community initiatives.**
- 5. To publish on an annual basis the 'Rated Performance' and Income Generated from fixed and mobiles devices, together with all performance metrics and targets set in relation to their operation.**
